JUL/AUG: Upper A Boom, Shear Boom 1

# Fish Passage Facility Project Purpose

#### Goal:

Provide sub-adult and adult bull trout access to habitats upstream of AFD and re-establish connectivity of bull trout critical habitat above and below AFD.

#### **Objectives:**

- Provide sub-adult and adult bull trout access to habitats upstream of AFD throughout the 50-year period of analysis.
- Re-establish connectivity of bull trout critical habitat above and below AFD during the 50-year period of analysis.

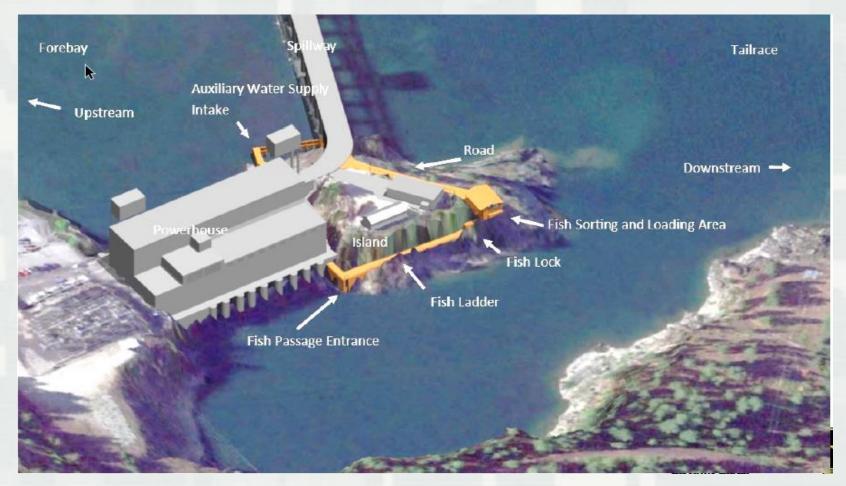

### Fish Passage Facility Project Overview

- Feasibility Phase Completed in 2018
- Design Phase has started with an estimated 3 year schedule.
  - ► Why? Complicated design building into existing dam footprint. One year effort just on the geotechnical investigation for tunneling through the island that connects the powerhouse and spillway
- Construction Phase
  - Estimated Advertisement period of one year
  - ► Estimated 2 years for construction phase
